

OPTIMUM GLOBAL

INTERNATIONAL INSURANCE SOLUTIONS

Marco La Rosa

Age: 41

Nationality: Peruvian

Status: Married

Country of residence: Guyana

Occupation: Mining Engineer

Cover: Worldwide Plan - Comprehensive

When Marco La Rosa moved to Guyana from his home town of Lima in Peru his friend suggested Optimum Global. Having never worked outside of Peru before Marco was happy for the recommendation. He was pleased to discover that Optimum Global was also listed as an acceptable insurer to cover expatriates in Guyana and decided to purchase the Worldwide Plan and Comprehensive cover level.

Marco travels extensively around Guyana as a freelance mining engineering consultant, and a typical day will involve driving by car or flying by helicopter to remote mining areas to assess their efficiency, production and safety and provide advice to their management and owners. Marco tends to work in his office in the morning and undertake mine visits in the afternoon. In his free time, Marco likes to cycle, rock climb or read. He is married but does not have children so whenever possible Marco and his wife like to spend time in the beautiful Guyanan countryside.

Although so far Marco has never had to make a claim, Marco feels that Optimum Global is a responsive and helpful company. When he has contacted Optimum Global to ask advice he has always encountered polite and helpful staff when calling the 24 hour helpline. Optimum Global's extensive network and reputation for quality puts his mind at ease and he feels in much safer hands than if he was insured by a local Guyanan insurance company who might fail him in his hour of need.
